

A: Good morning! I was looking to buy a computer.

B: Of course! What do you need it for?

A: I want it for home, for daily use and some office tasks. I need something small since my desk is not very big.

B: Maybe we could look into an all-in-one?

A: What is that? I have never heard about it. Do all the components come separately or something else?

B: All of the components are placed behind the monitor, so it's all in one place and you won't need much physical space.

A: Mhm... Interesting... What capacity and OS has it got?

B: From what you said, I recommend this one. It has 1 TB of storage, 16GB of RAM and it comes with Windows 11. Perfect for daily usage.

A: I like it but, this all-in-one, does it come with a mouse and keyboard? And, what about the screen size?

B: Yes! You do not need to buy them separately so don't worry about anything. The screen is 27", perfect for everyday use.

A: how much does it cost?

B: Your total would be 550€, but this item is on sale, so with your discount the total is 479€. Plus, since the amount is over 400€, you can get free shipping if you want it to be sent to your home.

A: Okey is to expensive bye bye, i will buy on amazon because on amazon the camera is included.

B: :( l:(a:(b:(u:(b:(u:(
